Re: City Project 2020-1
2020 Neighborhood Infrastructure Improvements

Curb & Gutter Placement

23rd Street West between Vermillion Street and Cannon Street

24th Street West between Vermillion Street and Cannon Street

25th Street West between Vermillion Street and Cannon Street

Dear Resident/Property Owner:

Recently, the contractor has been preparing the streets listed above for placing concrete curb and gutter. **Weather permitting**, curb and gutter construction in this area is scheduled to begin as early as **Tuesday, September 22nd**. The curb and gutter placement will take approximately 4 days to complete.

Please move any cars, trucks, trailers, etc., that you will need for the next 5-10 days out of your driveway and garage (that access the streets listed above) before **Noon on Tuesday, September 22nd**. You will not have access to your garage and parking areas during this 5-10 day period. This will allow the concrete to properly cure before driving vehicles over the curb. **Vehicles will need to be parked on other streets (Cannon St, 22nd St W, Bohlken Dr, Hackberry Dr) while the curb and gutter is being placed. Cars may be parked adjacent to, but not in contact with, the new curb approximately 4 hours after it is placed.**

If you have any questions, please call our office at 651-480-2334.

Sincerely,

Bryce LeBrun
Staff Engineer
